Dear Jill

Agreed – I had assumed that given the circumstances we ought not to renew his honorary status at present. This is also the view of Andrew and Gary

Subject: Sam Eljamel

Dear John

Further to discussion about Sam with the MRI Directors, i.e. Keith, John, Roland and myself, as you requested, regarding the question of continued University work, we now have an agreed opinion from MRI.

Because there is a question of probity in the GMC investigation, which we believe will still proceed despite his retiral, we feel that he should not have any role in research until after the GMC result is available. This is very distressing for Sam however, the probity issue is a key one for us in terms of research integrity and we feel that we cannot continue research access until this is clarified.

I hope this opinion is useful

Kind regards
Jill
